

## Product Information

**2X Taq PCR Master Mix**
**Catalog No.:** 40601

**Product Name:** 2X Taq PCR Master Mix

**Description**

Leadgene 2X Taq PCR Master Mix is a ready-to-use solution containing Taq DNA Polymerase (Cat. No. 40101), dNTPs (Cat. No. 40701), optimized buffer, and the blue dye. This Taq Master Mix is provided at 2X concentration and used at 1X concentration by adding template, primer, and H<sub>2</sub>O. It has the 5' to 3' DNA polymerase activity and 5' to 3' exonuclease activity without 3' to 5' exonuclease activity. The product has high extending speed around 1-2 kb/min. The PCR product has an "A" tail on 3' end which can be applied in TA cloning.

**Package size**

1 mL

**Storage**

-20°C

**Quality Control**

This product has passed the following quality control assays: functional absence of double- and single-stranded endonuclease activity. Each lot of Taq DNA Polymerase is assayed for amplification from as little as 10 ng of human genomic DNA.
